EDUCATION

B.Tech. in Civil Engineering   **May 2020**
Institute Of Engineering And Technology, DAVV, INDORE, GPA: 8.76

SKILLS

- **Front End:** HTML, CSS, JavaScript, React, Bootstrap, Tailwind CSS
- **Version Control and Tools:** Git, Visual Studio, REST APIs
- **Soft Skills**: Highly Dedicated, Hardworking, Eager to Learn, Keen Problem Solver, Time Management

PERSONAL PROJECTS

Dynamic Cart Experience: Crafting an E-Commerce Clone with Firebase Integration   **Dec 2023**
Technology stack: React.js, Firebase Authentication, React context API, Deployment

- Developed a React-based Amazon clone with Firebase for seamless user authentication. Facilitated user-friendly cart interactions, including real-time updates for added, viewed, and removed products.
- Deployed on Netlify for efficient hosting and scalability.

Weather App: OpenWeather API integration with Responsive Design   **Nov 2023**
Technology stack: React.js, CSS, API Integration, Icons

- Implemented a weather application utilizing the OpenWeather API and React hooks. Incorporated visually stunning weather icons for a more engaging and intuitive user interface.
- Utilized React hooks to efficiently manage states and facilitate dynamic updates.

Savor Sphere: A Responsive Restaurant Showcase   **Nov 2023**
Technology stack: REACT, CSS, Java-Script, HTML

- Designed a responsive and dynamic restaurant website using a combination of HTML, CSS, and JavaScript.
- Aimed to provide an engaging online presence for a restaurant, offering an intuitive and visually appealing user experience.

The Pig Game – A Fun Dice Game   **Oct 2023**
Technology stack: HTML, CSS, Java-Script, Problem Solving, Debugging

- Developed the "Pig-Game", a web-based, two-player game that showcases proficiency in core web technologies, including HTML, CSS, and JavaScript. Implemented complex player-switching logic.
- Demonstrated advanced problem-solving skills in front-end game development, emphasizing a systematic approach and a keen eye for design.

LinkedIn Clone: Crafting a Responsive Clone with React and Styled Components   **Oct 2023**
Technology stack: HTML, CSS, Problem Solving, Debugging

- Prepared a React-based LinkedIn clone with Firebase for secure sign-in authentication.
- Utilized styled components for granular CSS styling, integrating grid and flexbox layouts for responsive design. Employed modular components to ensure codebase organization, maintainability, and fluid user interactions.
- Added functionality to allow users to upload and preview local media files for potential posts.
